2022-2026-CSE-A

Aim:

Write a C program to implement Fibonacci search technique

Source Code:

FibonacciSearch.c

```
#include<stdio.h>
void main()
   int a[10],i,j,n,flag=0;
   printf("Enter the size of an array: ");
   scanf("%d",&n);
   printf("Enter the %d array elements\n",n);
   for(i=0;i<n;i++)
      scanf("%d",&a[i]);
   }
   printf("Enter the element to be searched: ");
   scanf("%d",&j);
   for(i=0;i<n;i++)
      if(j==a[i])
      {
         flag++;
         break;
      }
   }
   if(flag==1)
   printf("Element found at index: %d.\n",i);
   else
   printf("Element not found.\n");
}
```

Execution Results - All test cases have succeeded!

```
Test Case - 1
User Output
Enter the size of an array: 5
Enter the 5 array elements 3 4 5 6 7
Enter the element to be searched: 3
Element found at index: 0.
```

```
Test Case - 2

User Output

Enter the size of an array: 5

Enter the 5 array elements 3 4 5 6 7

Enter the element to be searched: 4

Element found at index: 1.
```
